DON'T LET UNRULY HAIR GET IN THE WAY OF YOUR FIRST TRIP TO THE BEACH THIS COMING SUMMER – THE COOLER MONTHS ARE THE PERFECT TIME TO START PREPPING WITH THE FIRST AT-HOME PERMANENT HAIR REDUCTION SYSTEM: THE E-ONE.

Waxing, shaving, plucking – the lengths we go to for smooth, hair-free skin are the least inspiring parts of the modern woman's beauty routine, not to mention the most painful. But rushing to remove the last skerrick of leg hair before an event is not a good look for anyone, especially if you've spent your last dollar on a sub-par professional waxing job.

Ladies, listen up! The cooler months are the perfect time to get permanently hair-free in time for striking a pose on the beach this summer. Introducing the E-One – the first and only medically approved IPL hair reduction device certified for personal use at home.

The convenience and privacy of at-home use combined with a proven safety record means beauty fiends can get their hair-free fix whenever they desire, without the hefty investment – and you can even share the cost with your friends.

Developed and manufactured in France, the E-One is the only medical grade hair removal device for home use in the world, using Intense Pulsed Light (IPL) to permanently remove hair from any part of the body. It's uncomplicated, portable, décor-friendly and best of all, its appointment book is always clear!

So, how does it work? Approximately eight days after each treatment, treated hairs will start to fall out progressively. Once they have fallen out, they may start to regrow after 40

to 60 days. There's no need to be alarmed – after numerous treatment sessions, hair regrowth will be continuously thinner and less populated. Finally, after about 10 to 12 treatments around six weeks apart, only one or two uses per year should be required to keep skin clear and hair-free!

And sticklers for safety can rest assured they're in good hands. The in-built safety regulation only allows you to use the device if all the parameters are adhered to; the E-One cannot emit a flash if the user has not manually confirmed they are wearing the protection glasses, and the device won't activate if it is not in direct contact with the skin.

Don't let rogue curls ruin your favourite bikini – put your winter downtime to good use and get smooth, soft and fur-free once and for all!

Professional, long-lasting results in the comfort and privacy of your own home

The first medical hair removal device using IPL technology for home use, the E-One is:

- Tailored to your skin and hair type to gradually achieve permanent hair reduction
- Clinically proven to provide professional results in the privacy of your own home
- When used appropriately, it is safe and painless, with 20,000 users already enjoying results!

Currently available in Lime Green, Dark Blue or Dark Pink, the E-One can be purchased online at www.e-one.com.au for \$2,495, with convenient payment and finance options available. For more information contact Aurelien Coursodon at France Cosmetic on 07 3607 0032 or email aurelien@e-one.com.au
